

# AEROSPACE: NEXT GENERATION PRODUCTS AND SUSTAINABILITY APPROACH

## WHY?

ALTANA is consistently focused on sustainable, profitable growth. Our most impactful lever for enhancing sustainability is our product solutions, which make our customers' products more sustainable.

We believe in a Sustainable approach, as heart of the Composite industry transformation to Net Zero.

## INNOVATION: NEW PREPREG FAMILY EP200

- + Based on a solvent free epoxy and glass reinforcement for interior applications.
- + Possibility for snap curing (5 min in press)
- + Replacement for phenolics
- + Excellent FST performance – compliant with FAR 25.853

# NEXT GENERATION PREPREGS

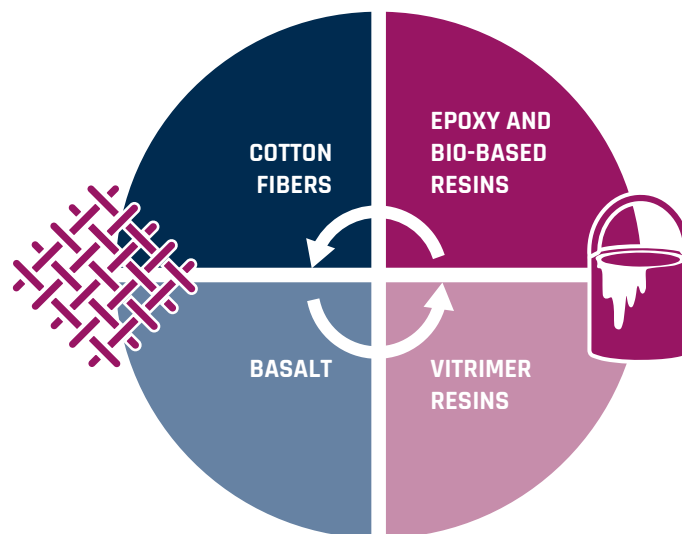

SUSTAINABILITY THROUGH MATERIAL SCIENCE  
AND PROCESS OPTIMIZATION

## KEY BENEFITS

- + Solvent free prepreg for interiors applications
- + High stability allowing storage above zero degree temperature
- + Raw materials free of CMRs and obsolescence risks

## DIFFERENT APPROACHES AND R&I INITIATIVES BASED ON SUSTAINABLE RESINS AND REINFORCEMENTS
